Experience

- Nov. 2018 – Present, Software Engineer, *Huawei Inc.*, Shanghai, P.R.China
- Apr. 2017 – Nov. 2018, Software Engineer, *Citigroup Inc.*, Shanghai, P.R.China

Job Projects

Tech Lead

Duty for development and leading the architecture design

Huawei Research

Nov. 2018 – Present

Codeless Lowcode Platform for UI Design; SwiftUI-like Plugin for VSCode/IntelliJ

HMS Toolkit A plug-in for integrating the HMS Core for developers

Ark Compiler Compiling Android Dex to MapleVM/Runtime

Engineer

Duty for development and Continuous Integration

Citigroup

Apr. 2017 – Nov. 2018

WIRE Wire Transfer system for block trading agent

EWARA Anti money laundering platform

HAMSTER AI project for bank statement understanding

Miscellaneous

Side Projects

Project Lambda

web app

founder

Nov. 2016 – Jan. 2017

A Hacker-News-like social information platform focusing on IT industry and computer science, which users could publish general news, academic contents and questions through it

Keywords Haskell 8.0.2, Scotty, Persistent, mime-mail, websockets, Blaze, PostgreSQL, Bootstrap, jQuery

Github Address <https://github.com/ProLambda/Times>

Chinese Blog Article <https://izhen.me/2017/08/20/aws-lambda/>

PPrinter: A generic derivable Haskell pretty printer

Haskell Library - 1413 times download till 05/27/2018

author

Jun. 2016 – Aug. 2016

PPrinter is a Haskell library that supports automatic derivation of pretty printing functions on user defined arbitrary data types (the deriving mechanism supports the automatic generation of instances for functions)

Keywords Dissertation Project, Hackage, Haskell 7.10.2

Hackage Address <http://hackage.haskell.org/package/PPrinter-0.1.0>

Compiler of Small-C

system software

developer

Oct. 2015 – Dec. 2015

A compiler for the subset of C language that compiles the source code to Java bytecode. It contains the essential parts of a standard compiler including lexer, parser, semantic analyzer and code generator

Keywords Java 7, ASM 4

Github Address <https://github.com/i-zhen/Reactor-C>

Interpreter of ML-like Programming Language

developer

local app

Oct. 2015 – Oct. 2015

An interpreter written in scala for a simple ML-like programming language which supports syntactic sugar, type checking, recursive function and first-order lambda calculus

Keywords Scala 2.11.7

Github Address <https://github.com/i-zhen/apache-longbow>

School Team

Sun Yat-sen University ASC Student Supercomputer Challenge Team

Team member

2014

- o ASC14 required the team to wring the most HPC performance out of a 3000W power allowance
- o Mastered the numerical methods, relevant algorithms, heterogeneous and multiprocessor programming
- o Optimized the SU² – a Stanford University developed open-source C++ code for PDE analysis and designed things that adhere to PDE constraints, and assisted in the HPL event

Professional Skills

Programming Language and Framework

Language: Haskell, C/C++, Java, TypeScript, Python, Rust, Scala, Prolog, Coq, Isabelle

Framework: Spring, JMS, JUnit, Mockito, JDBC, Java servlet, SQL

Awards

First Prize and Highest Linpack Award

The ASC Student Supercomputer Challenge (ASC14)

2014

Set a new world record of HPL(Linpack) performance and won 10,000 CNY

Bronze Medal

The ACM-ICPC China Guangdong Provincial Programming Contest (GDCPC)

2014

Two-time recipient of First Prize

The National Olympiad in Informatics in Provinces (NOIP)

2009&2008

Education

University of Edinburgh

Edinburgh, U.K.

Master of Science in Artificial Intelligence

Sep. 2015 – Nov. 2016

Dissertation: Deriving Pretty-printing for Haskell, supervised by Prof. Philip Wadler

Sun Yat-sen University

Guangzhou, P.R.China

Bachelor of Engineering in Software Engineering

Sep. 2011 – Jun. 2015

Recommended for admission to SYSU and exempted from Gaokao because of well performance at NOIP
